Founded in 1996, OTAL is a family-owned trading company built on a deep commitment to placing our clients' interests at the heart of everything we do. From our beginnings in Dubai, we have steadily expanded our reach across the Gulf and the wider Middle East, establishing a strong trading network and

a reputation for reliability, integrity, and forward-thinking solutions. For more than three decades, OTAL has been driven by a passion for innovation and quality.

We provide our customers with access to the latest technologies in construction and environmentally sustainable recycling systems.

Our focus is to ensure that every client benefits from advanced, efficient, and future-ready solutions that support their growth and operational excellence. Excellence defines every area of our business—sales, technical support, operations, and administration.

We take pride in delivering outstanding results and continuously adapting to a rapidly evolving world.

By anticipating industry changes, we empower our clients and our team to stay ahead, embrace new opportunities, and navigate challenges with confidence.

A cornerstone of our service philosophy is reliability. We introduce cutting-edge products backed by a dedicated after-sales service department and a fully stocked spare parts inventory.

This ensures minimal downtime and uninterrupted productivity for our customers whenever support is required. At OTAL, we set the benchmark for customer service, working closely with our clients to understand their needs, solve problems proactively, and explore new possibilities together.

Freylit is a long-established Austrian environmental technology company known worldwide for its advanced oil-water separation systems and wash-water recycling solutions. Its technologies are widely used across fuel stations, industrial sites, and transportation hubs, including in the Gulf region.

Founded: 1983 in Austria, Specialization: Mineral and residual oil separation, oil-water separators, and wash-water recycling systems. Global Reach: Operating in 35+ countries, including the Middle East and the UAE
